OFFICIAL IDENTITY DIRECTION / 2026

PRGRS

BRAND BOOK

YOUR TRAINING. YOUR JOURNEY.

Track the work. See the growth.

The name is incomplete by design. Because progress never ends.

BOLD PR 01 APPROVED ICON

ACID GREEN DIRECTION

Version 3.0 | 07 November 2026

What is approved

The brand language and latest Bold PR 01 artwork are preserved. Supporting design rules below are proposed standards.

PRGRS Brand name; pronounced “progress”.	APPROVED
YOUR TRAINING. YOUR JOURNEY. Official brand statement; exact punctuation.	APPROVED
Track the work. See the growth. Official tagline; exact capitalization.	APPROVED
Bold PR 01 The latest user-approved, clean PR icon; geometry is not redrawn.	APPROVED CONCEPT
Acid Green / Carbon Working colors for the system; values are proposed implementation tokens.	PREFERRED
Typography / UI details To validate against real screens and accessibility tests.	PROPOSED

PROGRESS NEVER ENDS.

PRGRS exists for people who do the work. Every completed session, adjusted plan and honest result becomes evidence of growth.

The experience values consistency over perfection, personal development over comparison, and practical training tools over noise.

PROGRESS OVER PERFECTION

CONSISTENCY OVER INTENSITY

EVIDENCE OF GROWTH

PR = Personal Record

A second layer of meaning that strengthens the icon without changing the established PRGRS name.

PR

PERSONAL RECORD

A personal record is a milestone. Valuable, measurable and worth remembering.

PRGRS

THE LONG GAME

Progress also happens between records: training consistency, restored confidence, completed sessions and sustainable habits.

Bold PR 01

Approved icon artwork. No modified letters, artificial cutouts, gradients or compositing effects.

APPROVED CONSTRUCTION

A bold, connected italic PR rendered in deep black on an acid-green rounded-square field.

- Readable P and R forms
- Solid black letter fill
- Clean connection between letters
- Distinctive rounded-square silhouette
- No blur, shadow or translucent patch on R

One icon. One source.

Every derivative must originate from the approved artwork, not from a new AI rendering or substitute typeface.

STATUS

Approved concept image

NEXT

Vector trace / optical review

The master currently exists as raster artwork. SVG master curves and trademark clearance remain separate production tasks.

A disciplined logo family

Use the approved symbol consistently. The PRGRS wordmark below is a supporting typeset proposal, not a second custom logo.

PRGRS

PRIMARY LOCKUP

Icon + name

PRGRS

WORDMARK-ONLY / TEXT NAVIGATION

PR

APP / AVATAR

PR

ONE-COLOR

Fallback only. Exact vector silhouette to be derived from the master.

Small-screen recognition

The PR mark must remain identifiable on a phone home screen, browser tab and install prompt.

LARGE / 512+

MEDIUM / 192

SMALL / 64

TINY / 32

Keep the original asset geometry. Inspect rasterized 32, 48, 64, 192 and 512 px exports at 100% scale. For maskable PWA icons, verify safe-zone clipping without altering the PR letterforms.

Protect the mark

Clarity and consistency matter more than decorative effects.

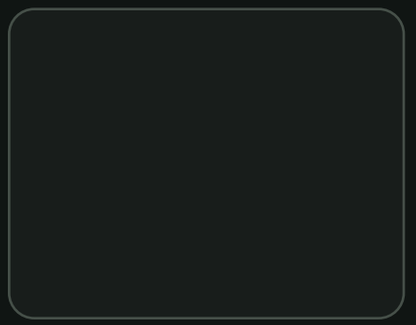

CLEAR SPACE	Use a minimum buffer equivalent to roughly 1/8 of icon width.
SOLID FILL	No shadows, glass effects, blur or color stains over the black letters.
NO DISTORTION	Do not stretch, rotate, italicize further or redraw either letter.
CONTRAST	Avoid placing the icon against busy photos without a stable container.
ONE MASTER	Do not use the old TR-like or striped alternatives as the PRGRS icon.

Acid Green / Carbon

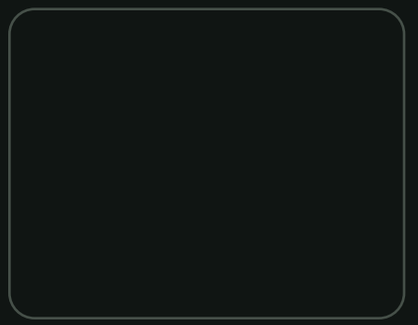

A bold, high-contrast signature supported by restrained, versatile neutrals.

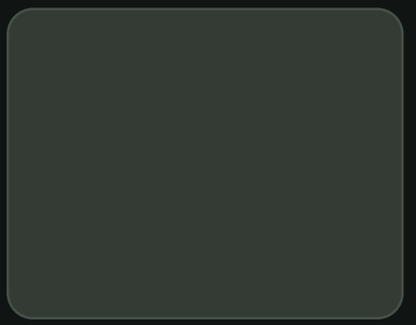

ACID GREEN
#C5F500

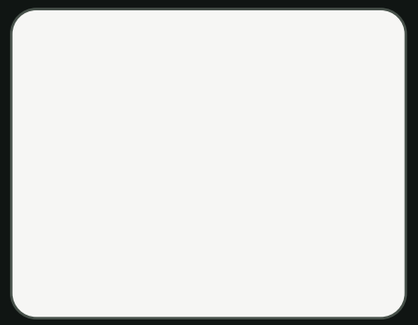

CARBON
#181D1B

INK
#101513

GRAPHITE
#343B35

OFF-WHITE
#F6F6F4

Suggested roles: green for signature branding and high-value actions; carbon/ink for dark surfaces; off-white for primary text and light backgrounds; graphite for secondary surfaces. Green is an accent, not a substitute for semantic status colors.

Two first-class themes

Dark mode can feel cinematic; light mode must still feel native to PRGRS.

DARK / PERFORMANCE

Strength + Run

Today · 6 exercises

OPEN

Your progress

5 / 6 exercises

Avoid green text on light surfaces where contrast is insufficient.

LIGHT / CLARITY

Strength + Run

Today · 6 exercises

OPEN

Your progress

5 / 6 exercises

Use dark ink for light-theme text, with green reserved for carefully tested accents.

Contrast before decoration

Bright accent colors are not automatically readable in every text/background combination.

Dark text on Acid Green	**14.4:1**
Acid Green on Ink	**14.4:1**
Off-white on Ink	**17.0:1**
Acid Green on Off-white	**1.2:1**

WCAG reference: normal text >= 4.5:1 and large text >= 3:1 at AA. These sample pairings are calculated from the working palette; validate actual UI colors and states.

Strong. Fast. Legible.

Typography recommendations for a mobile-first training product, not a replacement for the master PR icon.

PRGRS

Display / bold / restrained tracking

TRAINING WITHOUT THE NOISE

Workout detail: 4 × 8 @ 70 kg

Support text: rest 90 sec · RPE 7 · last result 67.5 kg

Suggested system: Inter or comparable sans for product UI; compact, bold display styling for headings. Prioritize tabular numerals, diacritic support, readable prescriptions, responsive scaling and clear weight hierarchy.

Visualizing improvement

The app speaks with information hierarchy, deliberate spacing and a few strong shapes.

Suggested motifs: stepped growth, progress bands, measured intervals and understated forward diagonals. These are secondary graphics; do not confuse them with the PR master mark.

Athlete dashboard

Workouts and evidence of progress take priority over marketing copy.

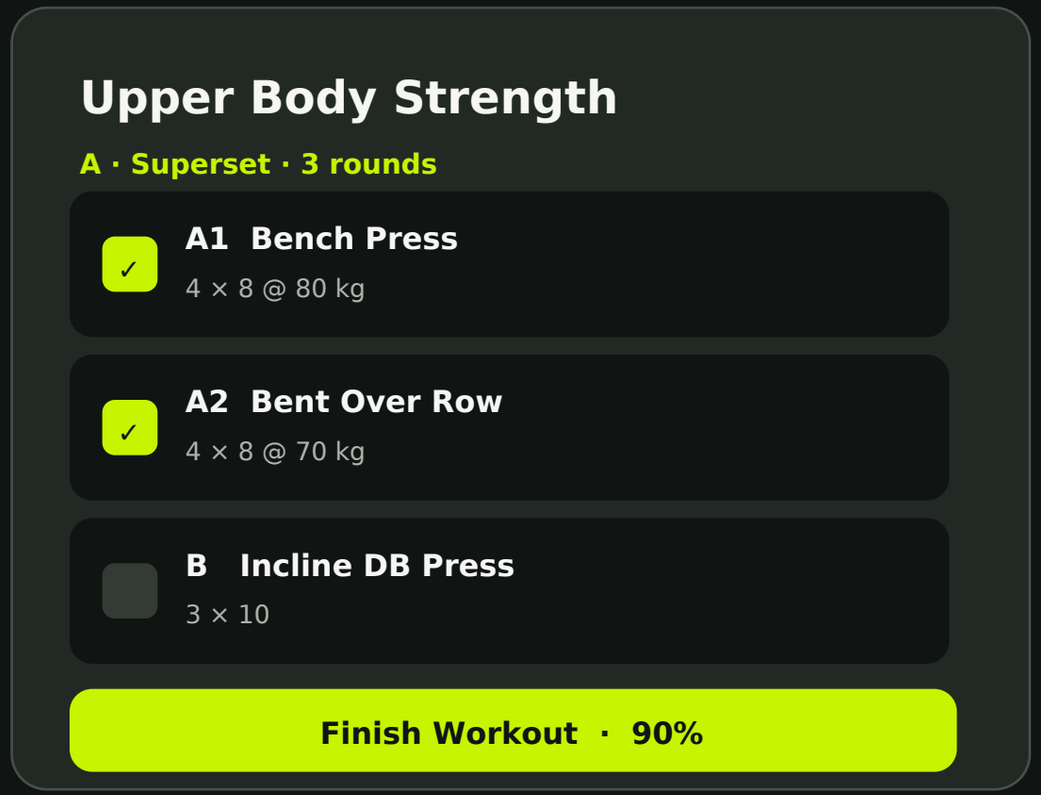

DESIGN DIRECTION

A concise home screen with today’s workout, meaningful progress metrics, clear navigation and no fabricated results.

- Today’s action is immediately visible.
- Exercise completion is separate from workout status.
- Offline state remains explicit and reliable.
- Visual polish never slows down logging.

A workout is not all-or-nothing

The interface should make finishing 90% of a session feel honest, useful and complete.

Finished means the athlete ended the workout. It does not mean every exercise was completed.

PREFERRED COPY

Session finished · 90% of exercises completed.

Never auto-check omitted exercises. Preserve the actual recorded work, history and partial completion percentages.

Reliable by design

The visual identity extends to admin tools, workout history and synchronization states.

COACH MODE	Utility-first program builder; same brand, less decoration.
OFFLINE	Clear indicator when the network is unavailable.
PENDING SYNC	Preserve visible edits; show truthful pending status.
SYNCED	Confirm persisted changes without aggressive interruptions.
ERROR / CONFLICT	Provide accessible recovery actions, never silent data loss.

Confident, not performative

Language should reward effort without inventing milestones, guilt or pressure.

DO

- Continue workout
- View exercise history
- Add a note
- Sync pending
- Session finished · 90% completed

AVOID

- You failed your session
- Crush every workout, no excuses
- Fake personal-record celebrations
- Unclear completed vs logged states
- Repeated slogans on every card

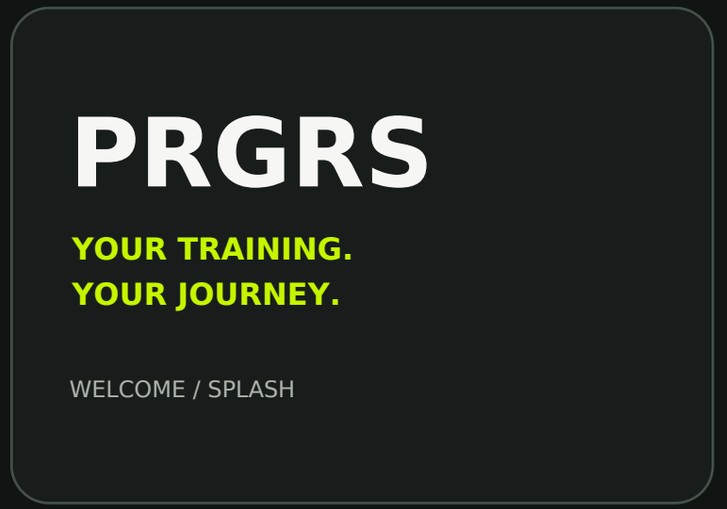

Brand language appears meaningfully on onboarding, marketing and About pages. Inside workouts, precise labels and useful information are more important than repeated taglines.

Across every touchpoint

A unified identity for PWA, landing pages, coach workflows, merchandise and lightweight social use.

HOME SCREEN ICON

For print or physical merchandise, use a verified vector master rather than enlarging raster assets. Preserve a one-color fallback and minimum size guidance.

Before public launch

The approved visual concept is ready to guide design. A final production identity still requires validation.

MASTER VECTOR	Trace or redraw exact shapes under human review; export genuine SVG and PDF vector assets.
ICON QA	Check iOS, Android maskable icons, small favicon sizes and color reproduction.
ACCESSIBILITY	Audit actual text contrast, target sizes, focus states and reduced motion.
ORIGINALITY	Conduct a trademark and visual-confusion review against relevant fitness brands.
BRAND CONSISTENCY	Use one canonical icon file; do not silently regenerate it in Codex.

Codex brand contract

Use this book as visual direction alongside PRGRS_PRODUCT_SPEC.md. Do not reinterpret the approved logo.

```
--brand-acid: #C5F500;
--brand-carbon: #181D1B;
--surface-dark: #101513;
--surface-raised: #222925;
--text-on-dark: #F6F6F4;
--brand-graphite: #343B35;
--text-muted: #ADB5AD;
```

IMPLEMENTATION GUARDRAILS

- Keep exact brand copy and PR icon.
- Treat colors as proposed design tokens.
- Deliver both light and dark themes.
- Never confuse exercise % with session status.
- Preserve offline-first reliability and accessibility.
- Verify all screen states and production builds.

The raster image is the current approved concept master. Keep it unchanged until a reviewed vector master formally replaces it. Product screens shown here are illustrative, not approved final layouts.

TRACK THE WORK.
SEE THE GROWTH.

The name is incomplete by design. Because progress never ends.
